**Subject:** Tree Work at Vineyard Park and Yountville Community Park

The Public Works Department will be conducting tree trimmings and tree removal starting May 7, 2019, at Vineyard Park and Yountville Community Park.

Five (5) Italian Stone Pines in deteriorating health will be removed from Vineyard Park in proximity to the floodwall on the southeast edge of the park. The removal will take place between May 7, 2019 and May 8, 2019. These trees will be replaced with a variety of new tree specimens as approved by Parks and Recreation Advisory Commission and Town Council. An Arbor Day celebration will be taking place in May as a part of the planting of the new trees.

The Town will also be trimming the top of two (2) Redwood trees located on the northeast corner of Yountville Community Park under arborist direction from May 8, 2019 until May 13, 2019. This effort is taken to help improve the vitality of these trees.

Parking spaces will be temporarily limited while work is being done on the trees.
