## Fats, Oils, Grease (F.O.G.)

---

Did you know that certain types of Fats, Oils and Grease can clog your drain and sewer pipes? Avoid a clog and keep grease out of your drain! The best way to prevent these unwanted clogs is to dispose of common sources effectively.

Common sources of FOG include:

Meat fats  
Lard  
Shortening  
Butter  
Margarine  
Fatty/greasy food scraps  
Baked goods and pastries  
Cream-based sauces  
Cooking oil  
Oily salad dressing

## Here's What To Do:

- Pour all cooled cooking fats, oils and grease that will harden (bacon grease, meat drippings) into a waxed food container such as a milk carton or container with a lid and dispose of it in the garbage or your kitchen scrap recycling.
- Mix small amounts of liquid grease into your kitchen scrap recycling (where available) or place in a lidded container with an absorbent material such as cat litter, and dispose of in the garbage.
- Wipe down greasy pots, pans or dishes with a paper towel or newspaper into the trash before washing.
- Dispose of paper in the garbage or your kitchen scrap recycling (where available)
- Do not wash grease down the drain or garbage disposal.
