No Wipes Down the Pipes!

Wipes, cloths, and rags are being found in sanitary sewers at an ever increasing rate. Many of these products are labeled as flushable, but while they may clear the toilet, they will most likely cause problems downstream as they are NOT biodegradable.

These products are becoming notorious for blocking private sewer laterals, public sewer mains, and binding up municipal pumps. Items that specifically say they are flushable (but should not be flushed!!) include diapers and diaper liners, baby wipes, pre-moistened wipes of any kind, a wide variety of bathroom cleaning wipes and brushes, feminine hygiene products, toilet seat covers, doggy doo-doo bags, and cat litter. Other products have been found to clog pipes and pumps after being flushed include Q-tips, dental floss, paper towels, and rags. Instead, please place these items in a trash can.

Even if a product says it is "Flushable" ... Unless it is toilet paper, it should not be flushed!

Hopper Creek Park Updates

What began as the site for a new addition to the Yountville Art Walk has now become a fully revitalized park space for all to enjoy.

The Yountville Arts Commission began working with local artist Freeland Tanner a year ago on a sculpture for the space. Along the way, Freeland's wife Sabrina, a local landscape architect, offered to volunteer her services to design landscaping for the space which would not only enhance the sculpture but vastly improve the park site.

On October 20 the drought tolerant plants were delivered and installed by our Public Works crew. An additional piece of art will be installed in the center of the park, mulch will go in and new benches will be installed creating a beautiful space to take a break and enjoy the view along Washington Street. Stop by and take a look!
