

Envision Yountville Speaker Series Dates

The next several months will be exciting ones for the Town of Yountville. Beginning on February 16, 2017 the Yountville Community Center will house five engaging community events that are all about what makes Yountville "Yountville". This five-part speaker series will include special guest speakers from our region as well as nationally respected planning experts who will discuss important topics related to community character.

All sessions begin at 6:00 p.m. at the Community Center

The dates and topics are detailed below:

February 16 – Overview of Envision Yountville

This speaker session will feature a group of local planning experts that will discuss the past, present, and future of Yountville.

March 9 – Mobility

This session includes local representatives of several transportation authorities and coalitions and will focus on how we all get around the community.

March 23 – Achieving Balance: Residents and Business

The central theme of this session is the relationship between Yountville's residents and its world renowned businesses.

April 13 – Agricultural Preservation and our Future

The vineyards around Yountville are one of its most beautiful characteristics. This session will focus on the Town's relationship with the agricultural lands around it.

May 18 – Community Character

Join renowned speaker and author of "For the Love of Cities" Peter Kageyama in the final session featuring a general discussion on what gives a community its character.

More information on each session will be provided as the dates approach. Be sure to continue to follow the Town of Yountville on social media as more news comes out.

Reminder: With the onset of winter storms, don't forget to turn your sprinklers and outside irrigation off! Every drop counts!

February Safety Message:

We are asking Yountville residents to please lock their vehicles when they are not in use, and hide any items of value out of view (or take them out of the vehicle whenever it is parked).

We have evidence from a local business with video surveillance, that the suspects were only entering unlocked vehicles. Visit the Town's website for more safety tips!

Hot off the Press! Introducing the Town's Sustainability Page

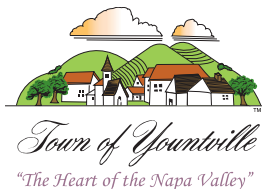

Be sure to check out the new interactive [Sustainability Page](#) on the Planning & Building section of the website! Utilizing a new GIS-powered app, this page dives deeper into the recent efforts the Town has made to be more sustainable and environmentally responsible. The recently adopted Climate Action Plan included goals and policies that were organized into five different sections: Energy Efficiency and Renewable Energy; Transportation; Water and Wastewater; Waste Reduction, Reuse, and Recycling; and Natural Systems and Sequestration.

What many don't know, though, is that the Town has already made great efforts into being more sustainable in each of these categories. Take a moment and learn more about everything the Town is doing in a new, interactive medium!
