Fire Preparation Checklist

Protecting lives from fire

- have at least one fire extinguisher in your home (preferably 2-A; 10-B-C) and know how to use it
- test the house smoke detector at least once a month and change batteries at least once every year
- Become familiar with the evacuation routes in the neighborhood
- Do not overload your electrical outlets
- Store flammable liquids in air-tight containers away from ignition sources such as pilot lights

Landscaping against fire

- Clear your property of excess and dead vegetation
- Trim low and overhanging tree branches
- Keep the grass cut at least 30 feet from your home as required by law
- Do not plant highly flammable plants in your yard
- Have garden hoses connected to all outside faucets
- Do not store fire wood near the house
- Consult with Yountville's CalFire Department

Home maintenance

- Your house numbers are large, contrasting colors and easily read from the street
- Have spark arresters on your chimney
- Your roof is fire-resistant
- Keep leaves and debris out of rain gutters

Earthquake Preparation Checklist

Home preparedness

- Have stored emergency food and water and other supplies
- Keep mini-survival kits in our cars
- Keep mini-survival kits at our workplaces
- Know the location of our utility valves and know how to shut them off. We have attached the necessary tools to the shut-off valves
- Have done a home hazard hunt and corrected any hazards that we found

Emergency Supply Checklist

Store the following emergency supplies:

- Food for family members and pets for 5-7 days (Grocery stores may be closed for days while employees clean up aisles. Trucks may be unable to make deliveries to restock shelves. Existing stock will disappear quickly)
- A minimum of 5 gallons of water per person (1 gallon per person per day for 5-7 days). The more water you can store the better off you will be
____ people in household x 5 gallons = ____ gallons (absolute minimum) needed.

- Cash and coins
- First aid items
- Flashlight, radio, tools, sanitation supplies
- Emergency shelter
- Camping gear (tent, lanterns, sleeping bags, stove can double as emergency equipment if possible, store it with your other emergency supplies)
- Car and workplace mini-survival kits
- Prescription medications
- Fire extinguisher
- Sanitary supplies
- Health and safety supplies
- Cooking equipment and eating utensils

Personal Disaster Plan Checklist

- Conduct family fire and earthquake drills
- Know two ways to evacuate our neighborhood by vehicle and on foot
- Plan where family members should meet after a disaster
- Have designated an out-of-area relative or friend as your emergency contact and instruct family and friends to contact that person to inquire about our safety
- Carry your contact's phone number in our wallets
- Have inventory of your belongings and home furnishings
- Have steps to protect your family's vital documents
- Know your child's school emergency plan and hold/release policy

Evacuation Priority List

- Before the need to evacuate arises note the most important items to be taken with you. List only those that can be hand carried. For example: Family heirlooms, important documents and computer files, clothing, disaster supply kit
- _____
- _____
- _____
- _____
- _____
- _____

Crime Prevention

The following tips will help reduce the risks for your household at any time:

- Report anything suspicious DAY or NIGHT to the Sheriff's office
- Keep all doors and windows locked
- Do not leave valuables in your car and keep doors locked at all times
- Activate your car and home alarms when unattended
- When going out of town, notify your local Sheriff's office for a vacation house watch (extra patrol) and stop mail and newspaper delivery

- Have a secure mailbox or P.O. Box to receive important mail
- Shred all personal information and important documents
- Check your credit reports annually from all three credit bureaus
- Make a copy of everything in your wallet, including account info in case your wallet is stolen
- Keep itemized lists of personal property with serial numbers in case of loss
- Do background checks on employees at your home & business
- Trust your instincts
- Contact your local Sheriff's office for additional information

If an Emergency Strikes

- Check for injuries
- Check for damaged gas, electric and water lines
- Shut off utilities only if damage is suspected
- Check for structural damage
- Display neighborhood signal flags: red for "help" or white for "okay"
- Check on neighbors
- Prepare for aftershocks
- Keep street clear for emergency vehicles
- Listen to radio and stay off the phone
- Retrieve your emergency supplies and Emergency Preparedness handbook for additional information

For a Wildland Fire

- Stay calm – keep family together
- Alert your neighbors
- Keep flashlight and portable radio with you at all times
- Dress in cotton or wool long pants, long sleeves shirt, gloves, hat, goggles, carry damp towel or bandana against smoke
- Confine pets
- Follow evacuation instructions from public safety officials or emergency broadcast radio
- Be ready to leave on foot or bicycle in order to keep roads clear for emergency vehicles
- If time permits:
 - Close windows, blinds, doors
 - Remove curtains and drapes
 - Shut off gas
 - Place a ladder against the house on the side away from the fire
 - Attach garden hoses to spigots
