YB-25-45	36294011000	\$8,036.00	1893 MULBERRY ST, Yountville, California 94599	Tobias	Halliday	7802 Maple Ridge Rd	Bethesda	MD	20814	I am replacing an obsolete Zinsco electrical panel, upgrading to 200A service, and adding a 50A EV outlet in coordination with PG&E. Â There is an oak tree in the easement for the underground electrical service to the house. Â Trenching for an upgraded power line is likely to impact this tree.PLANNING CONDITIONS:Â The preservation of the tree will require specific installation methods and route:1. Route for electrical line: Â As the new electrical wire emerges from the sidewalk box, immediately take a right-angle turn heading to the 1895 Mulberry property. Just before the property line, turn left and head towards the 1893 Mulberry backyard. See sketch in attachments and below.2. Â All trenching/digging must be done carefully by hand.Â Â No roots larger than 2-inches shall be cut.3. Â To protect the coast live oak, a six-foot chainlink fence around the oak and the critical root zone should be erected to prevent trespassing into the area, except for the installation of the new electrical service. See the sketch for the locations of this protective fence.4. Â Recommended that a Registered Consulting Arborist monitor the hand digging. Â Town Arborist is available for this if desired, or another registered arborist may be utilized.	3/20/2025 17:19	5/12/2025 21:29	CK ELECTRICAL INC	1755 INDUSTRIAL WAY SUITE 10	NAPA	CA	94558	890371
