

Town of Yountville

Resolution Number 20-4019

Approving and Recertifying the Sewer System Management Plan

Recitals

- A. In July 2005, the California Regional Water Quality Control Board (RWQCB) imposed new unfunded mandates for municipalities to develop a Sewer System Management Plan (SSMP).
- B. Sanitary sewer backups into buildings or sanitary sewer overflows (SSO's) from the pipes into the Napa River could result in cleanup costs and permit violation fees.
- C. The Town Council has adopted an ordinance to require grease interceptors at restaurants, adopted the "Design and Construction Standards" to set requirements for new construction, and adopted the Capital Improvement Program, which has numerous projects to reduce the inflow and infiltration of ground water into the sewer system.
- D. Town staff routinely clean sewer lines and have made an effort to educate the public about fats, oils and grease (FOG).
- E. On April 20, 2010, the Town Council adopted Resolution 2877-10 approving the Sewer System Management Plan.
- F. On May 5, 2015, the Town Council adopted Resolution 15-3256 approving and re-certifying the Sewer System Management Plan.
- G. The SSMP is an effort to minimize the cause of SSO's, implemented procedures for staff, and to mitigate the impact of SSO's.
- H. Town staff recently updated the plan to include improved response procedures and public education materials.

Now therefore, the Town Council of the Town of Yountville does resolve as follows:

- 1. Approves and recertifies the Sewer System Management Plan.
- 2. The Resolution is hereby adopted and becomes effective and in full force immediately upon adoption.

PASSED AND ADOPTED at a regular meeting of the Town Council of the Town of Yountville, State of California, held on this 20th day of October, 2020 by the following vote:

AYES: Mohler, Dorenbecher, Durham, Dorman, Dunbar
