WATER CONSERVATION UPDATE

WATER USE UPDATE

Rector Reservoir = 400 ac/ft

ANNUAL WATER CONSERVATION

Annual Goal = 400 ac/ft

Monthly Goal = 33.3 ac/ft

Seasonal Variation

MONTHLY WATER USE

Good News
21.6% Reduction

REMINDER

Don't be a drip!

Do your part to conserve our water

Yountville has been cutback to 80% of its water capacity from Rector Reservoir due to the severe drought. To meet that goal, everyone must reduce their water consumption by 20%.

Please do your part with this tip:

Install a drip irrigation system and a smart controller. This can save 15 gallons each time you water.
